

## Illustra Flex Firmware Update – Version 2.0.13

Date Issued: 03/09/2014

### Issue

The Illustra Flex 1MP and 3MP cameras that have shipped to date all use firmware version 1.39.

At the launch of the Illustra Flex camera product line version 1.39 had a known issue disabling the Illustra Connect feature to update firmware on single and multiple cameras. The release of updated firmware for the Flex line presents an issue for customers with single and multiple cameras running v1.39 firmware who want to update to version 2.0.13 to get the benefit of the new features v2.0.13 will enable.

### Solution

Firmware updates can be done one camera at a time using the camera web interface or we have developed a special update utility that works in conjunction with Illustra Connect to facilitate updating multiple cameras. The utility only applies to this update instance only, v1.39 to v2.0.13 for Illustra Flex. The new firmware corrects the Illustra Connect firmware update limitation so going forward from v2.0.13, firmware updates for Flex can be accomplished with Illustra Connect in the normal manner.

The Illustra Flex firmware update, version 2.0.13 will be available in 2 downloadable packages;

- 1) Firmware only
- 2) Firmware, the upgradeUtilityForIllustraFlex tool and UpgradeProcedureForIllustraFlex document for how the utility is used with Illustra connect, and the curl32 executable file.

### Note

---

**The instructions, UpgradeProcedureForIllustraFlex, for how the update utility is used must be read before using the utility for the first time.**

---

Illustra Flex Camera Models this applies to:

SKU	Description
ADCi600F-X002	Illustra Flex 1MP Box, no lens
ADCi600F-B521	Illustra Flex 1MP Bullet, varifocal 9-22mm
