[How to Auto-Focus an illustra 600/610 series camera](#)

The following prerequisites are required in order to access and edit the Auto-Focus function:

Internet Explorer 8 or above

Java enabled for browser

QuickTime enabled for browser

Directions:

1. Open Internet Explorer 8 or newer, and enter IP address of dome.
2. Login using Administrator credentials.
3. Select Focus from the list of Image options.
4. Set Speed to "5".
5. Zoom out; then zoom in until desired area is in image.
6. Use focus control to get image near desired focus.
7. Left click on area of image where you want the Focus Window to be placed. This should be a spot with high contrast, a clear line such the edge of a floor or wall, and items within Focus Window should be the same distance from the camera.
8. Left click the Auto Focus button. If the picture gets blurrier, click the Auto Focus button again and the focus motor will reverse direction.
9. If camera is focused correctly, you may exit the menu.

Troubleshooting:

1. If you do not see video, make sure that Quicktime is installed and enabled in your browser.
2. If you cannot zoom or focus, make sure that Java is installed and enabled in your browser.
3. If camera will not auto-focus, make sure that focus window is large enough so that reference area does not shift out of window during focusing. Also make sure that area in reference window contains clear lines with sufficient contrast.
